tuna	coconut
salmon	

Price for the each of the above profiles, including a total IgE, is €140. Sample requirement is a 5.5 mL clotted tube or equivalent.

Extended allergy screen (33 parameters)

egg white	english plantain
milk	wall pellitory
fish (cod)	common silver birch
wheat	shrimp
peanut	blue mussel
soybean	tuna
house dust mite	salmon
cat epithelium and dander	pork
horse dander	beef
dog dander	egg yolk
rabbit epithelium	chicken
<i>Penicillium</i> mold	turkey
<i>Cladosporium</i> mold	hazel nut
<i>Aspergillus</i> mold	Brazil nut
<i>Alternaria</i> mold	almond
timothy grass	coconut
mugwort	

This larger screen combines the available allergens. The price for the above profile, including a total IgE, is €200. Sample requirement is a 5.5 mL clotted tube or equivalent.

Single allergens:

Latex and chlorhexidine are also available as single allergens, specifically for healthcare workers. The price for either, including a total IgE, is €26; the price for both, again including a total IgE, is €46.

Cheese allergy screen is available comprising cheddar type and soft cheese. The price including a total IgE, is €46.

Sample requirement for each of the above is a 4.5 mL clotted tube or equivalent.

Other allergens:

Where a specific allergen is clinically suspected it may be requested and we will attempt to source a location. These tests will incur an additional cost.
