BON SECOURS HOSPITAL®

Nutrition and Dietetics

Bon Secours Hospital, Glasnevin, Dublin 9

“Good Help to those in need”

Introduction

The Department of Nutrition & Dietetics facilitates GPs in the North Dublin area by running an outpatient clinic once a week.

To refer a patient to the Dietitian:

Please give your patient a note for the Dietitian stating their diagnosis and any relevant blood results.

Your patient should ring the Dietitian to make an appointment. Generally all patients are seen within 2-3 weeks. All follow up appointments are arranged at the patient's convenience.

The Dietitian will provide the patient with a written diet sheet to take home if this is appropriate. The Dietitian will continue to see the patient until such time as the dietetic treatment is deemed to be completed.

You will receive correspondence detailing the progress of your patient.

Cost

Patients can claim a portion of the outpatient charge from their Private Healthcare Insurance Company.

Conditions treated on an outpatient basis

Obesity	Sports Nutrition
Undernutrition	Diabetes
Eating Disorders	Coeliac Disease
Hypercholesterolaemia	Gastric / Reflux / Gout
Irritable Bowel Disease	Constipation
Food Allergies	Unbalanced Diets

Who We Are

Bon Secours Hospital, Glasnevin, is a private, acute-care facility renowned for the quality of its service provision. It was the first hospital in Ireland to receive formal Quality Accreditation by Joint Commission International (USA). Comprising a total of 195 beds (141 Inpatient, 29 Day Case and 25 Endoscopy) 4 Major and 2 Minor Operating Theatres, Endoscopy Suite and a comprehensive range of ancillary diagnostic, treatment and support services, the Hospital attracts over 30,000 patients per annum across a wide range of medical and surgical specialties.

Bon Secours was the first Irish hospital to be accredited by
