# Your Big Adventure at the Hospital

When you arrive at the hospital  
you will meet a friendly nurse.

She will give you a  
bracelet with your  
name on it and some  
special cream!

Then you will need to stand on the  
scales so we can work out how  
much magic medicine to give you.

*Your nurse will take your temperature with a small machine like a mobile phone and listen to your heart with a stethoscope.*

Then the Doctor will come and talk to you. He is going to make you all better.

Your nurse will show you  
your big comfy bed.

You will make some new friends  
who have also come to hospital  
for a day or two.

A parent can stay  
with you all the time  
and you can bring  
your favourite toy.

When it is time to make you better, your nurse will bring some special gowns for you and your parent to dress up in and maybe some magic medicine.

A special Doctor will give you some magic gas or a magic drink that will make you very sleepy.

You might have something called a "Freddie" in your hand when the magic gas wears off.

When you wake up you will get 7up to drink, then some of your favourite food.

You will need to eat lots of your favourite things!

When the Doctor says you are better you can go home with your parent.
